22 **The questions that matter**

Rates are platform credit rules; payment availability is dated separately on page 14.

One platform. Two ways to earn.

Panda connects mining packages, game packages, wallets and rewards. A package sets the earning rules. The wallet records what has been credited and what you spend.

RIG MINING

A fixed rate over elapsed time. Paid rigs stop after 20 days.

PANDA RUN

Play a package. Verified distance determines each run credit.

YOUR WALLET CREDITS

Credits can fund another package when one wallet covers its full price. Withdrawal rules, fees and current payment availability govern requests to pay out.

Start with the free trial kit.

An active new account receives a one-time free rig and Scout trial. Promotional spins are released for eligible accounts; eligibility checks can hold those rewards.

01

FREE RIG

24 hours

R15 builds over the first 24 hours. Credits go to Free, then this rig stops.

02

SCOUT

5 days

3 started runs per SAST day. A verified 4,000m run credits R1 to Free.

03

WHEEL

3 spins

Eligible registration gives 3 promotional spins. Settled results go to Free.

THE CLOCK STARTS WITH YOUR ACCOUNT

24 hours and 5 days are elapsed trial periods. Scout runs reset at South African midnight; unused allowances do not accumulate.

Know which pocket holds each credit.

Main

Paid rig credits, paid panda earnings and settled leaderboard prizes. New payments buy a package directly.

Bonus

Commissions from the paid rig earnings of your three-level referral team.

Free

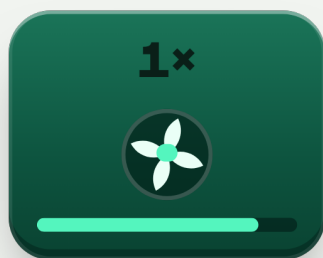

The free rig, Scout runs and collected Wonder Wheel winnings.

R80 Main + R30 Bonus

These balances cannot combine to buy a R100 package. One selected wallet must hold at least R100. The Home total is a summary, not another wallet.

Time does the earning.

A paid rig is a one-time in-app mining package. Once a purchase is confirmed, elapsed time determines its credits. You can close the app; confirmed server accrual continues to account for that time.

ALL PAID RIGS

20 days

An elapsed lifetime from activation, with a fixed quoted daily rate.

BUY ONCE

Pay directly, or use one earnings wallet.

CREDIT TO MAIN

All paid rig earnings arrive in Main.

STOP AT THE END

An ended tier requires a new purchase.

A 1x, 2x, 4x, 8x or 16x badge identifies the rig tier. Larger tiers increase the rate and price proportionally, rather than extending the 20-day lifetime.

The complete rig catalogue.

Daily rates and total credits below are before withdrawal fees. The free rig is a separate one-time trial; all paid rows run for 20 days.

Tier	Price	Per day	Life	Total credits	Speed
Free rig	R0	R15	1d	R15	0.5x
Starter	R300	R30	20d	R600	1x
Digger	R600	R60	20d	R1 200	2x
Crusher	R1 200	R120	20d	R2 400	4x
Titan	R2 400	R240	20d	R4 800	8x
Beast	R4 800	R480	20d	R9 600	16x

Free rig credits go to Free. Paid rig credits go to Main. Total credits are the entire package earnings; the purchase price is not returned again as a separate principal payment.

Follow one Starter rig.

PURCHASE COST

R300

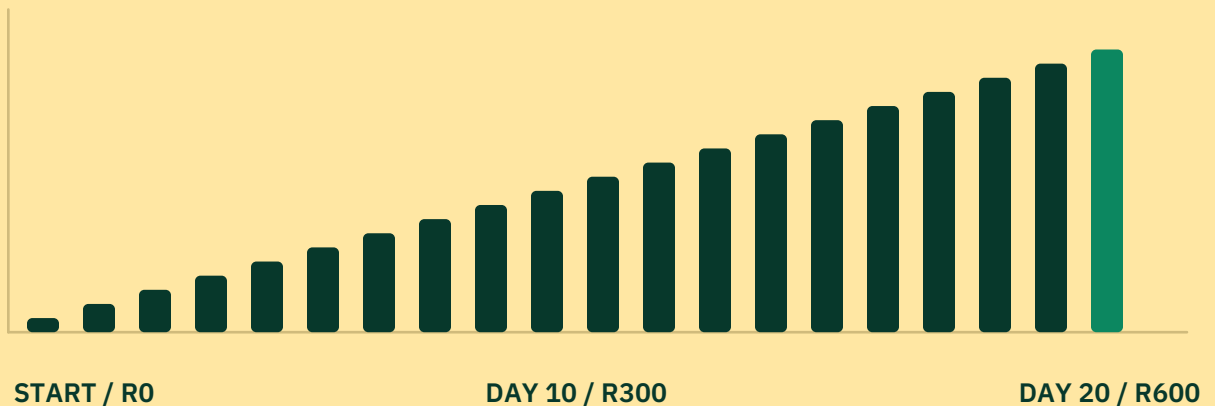

This example pays from one earnings wallet.

SCHEDULED RATE

R30 / day

Credits build for 20 elapsed days.

CUMULATIVE PACKAGE CREDITS

START / R0

DAY 10 / R300

DAY 20 / R600

R600 - R90 fee = R510

Gross request 15% fee Net rand equivalent

R600 is the total gross credit, not R600 plus a R300 refund. The fee example applies the configured withdrawal policy. USDT payout is currently unavailable; see page 14.

Play earns. The cap decides the end.

A panda purchase provides daily run allowances. Each completed run earns from verified distance. Paid pandas have no time expiry: the package retires when its credited earnings reach its lifetime cap.

LIMIT ONE

Daily runs

Started runs use the allowance, including runs that finish early.

LIMIT TWO

Total credits

Paid package caps equal twice the purchase price. A final credit is reduced to the cap remaining.

RESET IS MIDNIGHT IN SOUTH AFRICA

Unused runs do not carry forward. Paid panda earnings go to Main. Scout earnings go to Free and its trial ends after 5 elapsed days.

Every panda. Every key number.

The two distance columns are payouts for those verified distances, not guaranteed daily earnings. Paid pandas have no time expiry and stop at their total credit cap.

Tier	Price	Runs / day	At 160m	At 4,000m	Total cap
Starter	R100	10	R0.50	R1.50	R200
Digger	R250	10	R1.25	R3.75	R500
Crusher	R600	12	R2.50	R7.50	R1 200
Titan	R1 500	12	R6.25	R18.75	R3 000
Beast	R4 000	16	R12.50	R37.50	R8 000

SCOUT / THE FREE TRIAL

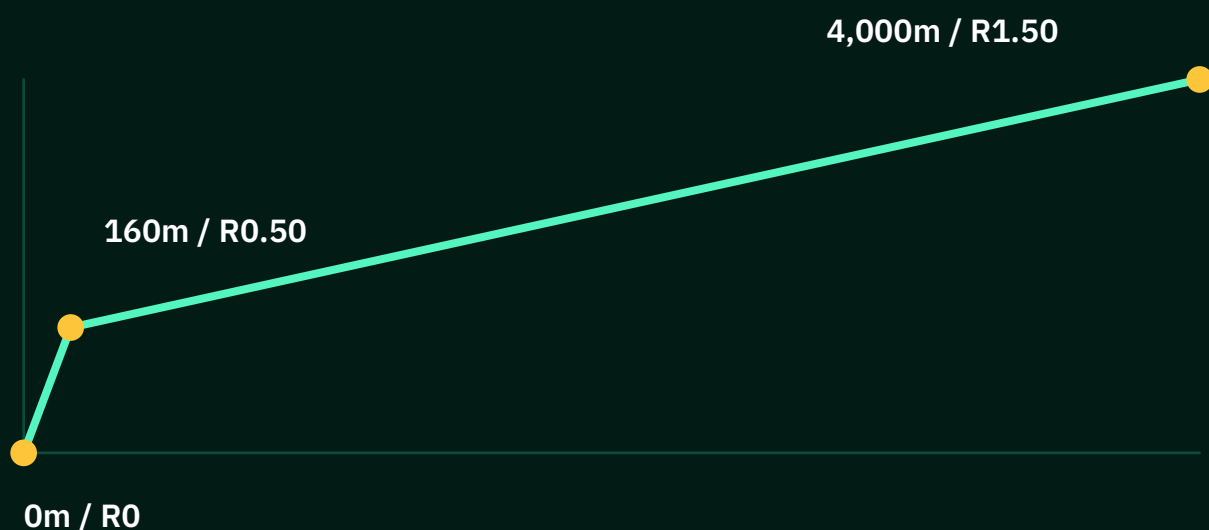

R0 / 3 runs per day / 5-day trial

R0.35 at 160m. R1 at 4,000m. Earnings go to Free.

Distance becomes a wallet credit.

The server verifies progress and settles the run. Jump over obstacles, with one extra jump in the air. A collision or early finish reduces distance. The moving in-run amount is an estimate until settlement.

STARTER PANDA / VERIFIED DISTANCE EXAMPLE

A CAPPED FINAL RUN

If a Starter panda has already credited R199.50 of its R200 cap, its final run can add only R0.50 - even if the usual distance payout is R1.50. The package then retires.

Choose a package. Then pay for it.

New payment money buys the selected package directly. It never tops up Main. You can also spend existing earnings from one Main, Bonus or Free wallet that covers the full price.

01 Choose the type

Rig: elapsed-time credits. Panda: verified-play credits.

02 Check the numbers

Price, rig lifetime or panda cap, and daily run allowance.

03 Choose how to pay

Purchase with a voucher payment order, or use one earnings wallet. USDT awaits setup.

You may own different tiers together and both a rig and panda of the same tier. One active package per type and tier is allowed. An ended paid rig or retired panda can be purchased again.

Your voucher buys your chosen package.

Choose the package first. Submit 1Voucher (16-digit PIN) or OTT Voucher (12-digit PIN), its brand and rand value against that saved order. An admin redeems and checks the actual value.

1

Submitted for your order

Pending review. No Main wallet funds are added.

**2**

Verified value applied

Enough approved value activates this package. A partial payment stays with the order until the price is covered.

**3**

Extra held for refund

Any excess awaits an admin-managed refund. It is never added to Main.

A rejected request does not activate a package. Follow the order, payment and any refund due in Transfers. Keep PINs private.

Know what is available today.

VOUCHERS / MANUAL REVIEW

1Voucher and OTT Voucher payments are redeemed and approved for the selected package. Extra funds await a manual refund. No deposit to Main is offered.

USDT / AWAITING PRODUCTION SETUP

USDT purchases and withdrawals are currently disabled. When enabled, use the order's saved quote and identify the exact transaction and transfer event. Excess stays held for a refund.

TRC-20 mainnet is the configured network. Payment availability and withdrawal figures are rules, not confirmation that a payout was sent. Check the current notice in Wallet.

[Check current payment methods](#)

Understand the fee before the request.

MINIMUM REQUEST

R100

Use one wallet with sufficient funds.

WITHDRAWAL FEE

15%

Deducted from the gross requested amount.

R100 - R15 = R85

Request

Fee

Net before USDT conversion

Free allows at most R100 of gross requested withdrawals per SAST day, including unresolved reservations. Rejected or safely failed requests release that day's quota. Main and Bonus have no equivalent fixed daily cap; every request must fit within the selected wallet.

The flow requires a saved TRC-20 payout address, your current password and admin review. A request reserves the gross amount before payment confirmation. Rejected or failed requests follow the server refund process.

USDT withdrawals are currently unavailable. This is the configured policy; see page 14.

A ledger entry and a payment differ.

Statement records earnings, wallet spending and withdrawal reservations. Transfers tracks package payment orders, withdrawal requests and any refund due. Read the amount together with its reason and status.

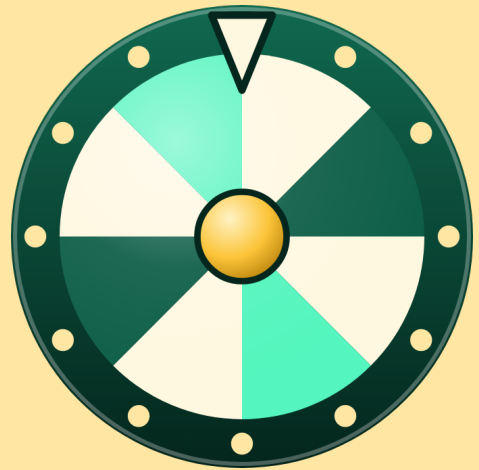

Withdrawal stage	What it means for your money
Awaiting approval	Gross funds are reserved; admin review is pending.
Queued	Approved and waiting for the payment worker.
Prepared	Transaction prepared; payment is not yet confirmed.
Confirming	Submitted to the network; success is being checked.
Paid	A successful token transfer receipt is confirmed.
Under review	An uncertain result keeps funds reserved until resolved.
Declined / failed	The full gross amount returns to the same wallet after safe resolution.

A delay alone does not cancel a payout. A pending package payment does not activate the package. Use the saved order and request references to follow the result.

Collect a result. Or change it.

A spin starts between R0.50 and R1.50.
Collect settles the current amount into Free.
Continue applies the next ring multiplier,
which can lower, preserve or raise the
amount.

**R1**

Example start

x0.5

Next ring

R0.50

New result

Later ring multipliers are 0.5x, 1x or 1.5x. The third ring settles automatically.
Before settlement, the displayed result is not a spendable wallet credit.

Eligible registration gives 3 spins. Each eligible direct referral can add 1. Spins are not an automatically renewed daily allowance.

Your team earns. Your Bonus grows.

A direct invite creates level 1. Their invite is level 2, and the next is level 3. Commissions are calculated from paid rig credits in that chain, with amounts rounded down to cents cumulatively.

10%

Direct friend

R3

of R30 rig credits

5%

Their friend

R1.50

of R30 rig credits

3%

Next level

R0.90

of R30 rig credits

All three examples assume that the earning member is at that respective level and earns R30. Commission goes to Bonus. Deposits, purchase prices, free rigs, panda runs and wheel winnings do not create rig commissions.

An eligible direct registration can also add a spin. Promotional spins and leaderboard participation depend on reward eligibility.

Activity sets the rank. Settlement awards it.

Leaderboards use qualifying, confirmed server activity within a SAST period. Daily periods run midnight to midnight. Weekly periods run Monday midnight to the next Monday. Live ranks can change until the period closes.

INVITES

Count eligible direct registrations in the period.

PURCHASES AND TEAM ACTIVITY

Completed direct purchases count once at the package price. Pending payments and surplus refunds add no score. Historical funding and earnings-wallet purchases retain their qualifying activity. Daily team points count each qualifying member once, at 100 points.

EARNINGS

The rig commission board measures paid rig commissions. Panda Run measures paid panda earnings, excluding Scout.

After a period closes, the server settles eligible winners and credits prizes to Main. A pending payment or an open-period rank is not an awarded prize.

The prize belongs to its board.

Prizes below are server credit amounts paid into Main after settlement. A board can award fewer prizes when fewer eligible ranked entrants exist.

DAILY / SOUTH AFRICAN MIDNIGHT TO MIDNIGHT

Board	Measure	Prizes
Most friends	Eligible direct joins	1st R200 / 2nd R100 / 3rd R50
Team deposit points	Distinct qualifying team members	1st R300

WEEKLY / MONDAY TO MONDAY

Board	Measure	1st prize
Most friends	Eligible direct joins	R650
Friend rewards	Paid rig commissions	R500
Top depositors	Own deposits + purchases	R550
Panda Run	Paid panda earnings	R400
Team leaders	Team deposits + purchases	R650

Keep the account clear. Make help specific.

Settings provides profile and password management. Sensitive actions require the current password. Registration and reward checks help the server detect repeated or abusive promotional accounts; held promotional rewards need account review.

A GOOD SUPPORT REQUEST

1 Topic

Package payment, refund, withdrawal, game or account.

2 Reference + date

Identify the relevant order, request or activity.

3 Amount + result

Explain what happened and what needs attention.

Follow your ticket and reply with useful details. Keep passwords and voucher PINs private; they do not belong in a support description.

Know the rule. Know your next move.

Does a panda pay automatically?

A paid panda needs verified runs. Its cap limits total credits, not a promised daily amount.

Do I receive a rig price refund at the end?

Its quoted total is the full package credits. There is no separate principal credit added to that total.

Can balances be joined for a purchase?

One wallet must cover the full price. Home adds balances for display only.

Is a withdrawal debit proof of payment?

It can be a reservation. The request result and payment confirmation determine whether it was sent.

What should I check before buying?

Package type, price, rate or run payout, lifetime or total cap, the paying wallet, fees and payment availability.
